

DOUBLE-FIRED PAINTER OIL

DESCRIPTION:

Consists of vegetable oils polymerized through a thermic process, to achieve a better resistance outdoors; this can be noted on a higher viscosity than a natural oil.

SPECIFICATIONS	
4 C° Ford cup viscosity	2 minutes
Solids	100%
Acidity index	<12
Color	Helliage: 8
Aspect	Translucid

APPLICATIONS: Its main use is on wood protection. It acts as an impregnating agent, due to its penetration, sealing, and water-repealing capabilities.

Analyzed samples meet the specifications.
